

Thursday

October

20th

7:00pm

A recent National Academy of Sciences report identifies increased health risks from radiation exposure to women and children living near nuclear power plants.

Hear the author of this report discuss what this means for communities surrounding the Seabrook Nuclear Power Plant

The evenings invited speakers will address the findings of the NAS report and include report author and Epidemiologist Eula Bingham, Ph.D., and Epidemiologist Dick Clapp, Ph.D., from the Boston University School of Public Health.

PUBLIC FORUM

Radiation Risk & What You Can Do

EVENT LOCATION

**Mass Audubon
Joppa Flats
Education Center**
