

Intern with the C-10 Research and Education Foundation

The C-10 Research and Education Foundation (C-10 Foundation) is a non-profit membership organization whose mission is to protect public health and the environment surrounding the Seabrook Station nuclear power plant in coastal New Hampshire. Our vision is a clean, safe, sustainable energy future.

Named for the citizens within the ten-mile radius of the plant designated as the “Emergency Planning Zone” (EPZ), the C-10 Foundation’s core service is to operate a field monitoring network to measure radiological emissions from the plant. The C-10 Foundation’s real-time data from carefully calibrated equipment is an important tool in protecting the public in the event of elevated radiation levels. This vital work is made possible with funding from the Massachusetts Department of Public Health and other supporters.

Known and trusted for our integrity and expertise, the C-10 Foundation communicates regularly with key local, state and federal agencies as well as NextEra Energy Resources, the plant’s owner. With over twenty years of monitoring data and technical knowledge of plant safety and security issues, we are also an informational resource for the public, partner organizations and the scientific community.

Internship Opportunities

The C-10 Foundation seeks qualified candidates who are passionate about environmental, health and energy issues to work with our small, Newburyport-based team. Reliable transportation is required, as public transport is limited. While our internships are not paid, we offer flexibility and a great chance to work with and learn from a mission-driven organization. We can also help arrange course credit or scholarships, if available. Start dates and hours are negotiable; typically we are looking for 3-6 hours per week for the duration of a semester or summer break.

Responsibilities

C-10 Foundation interns help with general administrative support, communications and research. Participating in staff meetings, educational webinars, and attending external events are all possible, as we wish to provide an enhanced educational experience. Sample projects include:

- Helping to build and maintain our contact database
- Research, analysis, writing briefs, fact sheets, etc.
- Supporting our social media and other communication platforms
- Writing/editing articles to inform our members and the public
- Helping to plan and coordinate workshops educational events

Qualifications

- Candidate may be a student pursuing a college degree, preferably in a related energy, environmental, public policy or business field. Exceptional high school candidates and mid-career candidates seeking experience are also encouraged to apply.
- Excellent verbal and written communications skills
- Ability to take direction, work independently and coordinate work with others
- Proficient use of spreadsheets, word processing, database and internet tools

When You Apply

- Please tell us why you are interested in working with the C-10 Foundation
- Send your resume to: natalie@c-10.org.
- Please specify the timeframe you are interested in working
- References are needed only upon request
